### **Coronado Elementary Seeks Video Shorts for Virtual Career Fair**

Coronado Elementary invites community members to create and submit short videos for a virtual career fair.

“We’re collecting videos about many different types of career paths,” said Nick Pahls, Coronado math coach. “We need a mix of videos about careers in skilled trades, requiring certifications or 4-year degrees - a broad range of careers to help increase students’ awareness of possibilities.”

While students actually begin planning their career pathways in middle school, early preparation for that starts in elementary school. Career fairs and other activities are held in elementary schools to help fifth graders explore the vast array of career choices and interests. At Coronado Elementary, school staff, together with the building Site Council, are planning a 5<sup>th</sup> grade career fair.

The videos should be no longer than seven minutes, must be submitted by April 23 and should include:

- Education requirements
- Opportunities for advancement
- Requirements of the profession
- How the profession serves a community
- How the profession is unique from others
- Any other interesting information about the profession

If you are interested in participating, video submissions can be sent to [nick.pahls@usd305.com](mailto:nick.pahls@usd305.com) no later than April 23.
